

## College and Career Readiness Cut Points

(aligned with Smarter Balanced Proficiency; approximately the 60-68<sup>th</sup> percentile)

The MAP Growth college and career readiness cut points are aligned with the proficiency cut points on the Smarter Balanced Assessment. These cut points measure if a student is on-track for college and career readiness—if they are on a trajectory to graduate from high school with the ability to pass a credit-bearing college course without remediation.

These cut points DO NOT represent the average or typical RIT score for a student at that grade level. DMPS adopted the Smarter Balanced aligned cut points in the summer of 2016 when the Iowa Department of Education intended to adopt Smarter Balanced. That all changed with the 2017 legislative session. When the state sets proficiency cut points on the Iowa Statewide Assessment of Student Progress (ISASP), our MAP cut points will change to align with that assessment.

In the Fall of 2018 At-Risk (AR) and Progressing (PR) were added as categories for the accurate identification of students that are considered At-Risk. The 30<sup>th</sup> percentile was the measure selected to determine the cut point for At-Risk identification. The charts below reflect the MAP RIT Scores for each category by grade.
