

District Interim Assessments

2020-21

Think. Learn. **Grow.**

www.dmschools.org

What are the Interim Assessments?

- The District Interim Assessments are replacing MAP as our 3-time per year screener for math in grades 6-10 and for English in grades 3-10.
- The assessments are designed by CenterPoint Education and were chosen because of their alignment to our district curriculum in English and math as well as our district goals of measuring grade-level core and providing culturally relevant/anti-racist systems.

- The delivery of the assessments to students will occur through two components of Instructure – Canvas & MasteryConnect.

What is MasteryConnect?

- Because CenterPoint does not have a delivery method for their assessments, MasteryConnect will be the tool that provides the assessments to students.
 - Think of Instructure as the parent to both Canvas and MasteryConnect.
 - Canvas houses the course content and assignments.
 - MasteryConnect delivers assessments and can track student performance on the standards that were assessed.

Teacher Role

- Create Tracker(s) from shared Curriculum Maps in MasteryConnect
 - Think of a Tracker as a spread sheet for your student sections in IC that will contain the students' scores for each standard that was on the assessment.
 - Secondary teachers will create a Tracker for each section they teach.
 - If you teach 5 sections of math, you'll need to create 5 Trackers.
 - Elementary teachers will only create 1 tracker for their section of students.
 - Elementary is only assessing English with the District Interim Assessments so you will only create 1 tracker for the students in your class.
- Connect the Tracker(s) from MasteryConnect to an assignment in Canvas.
- Push and Remove the Benchmark on test day.
- Monitor student completion of the assignment.
- Analyze student results to inform instruction.
